

## Flammable and Explosive Environments

Fire detector test products manufactured and sold by **detectortesters, No Climb Products Ltd** are not sold for use in flammable or explosive atmospheres. This statement relates to both electrical and non-electrical products that **detectortesters, No Climb Products Ltd** produce and sell. None of our products have been risk assessed or evaluated for use in such environments.

A risk assessment for the particular environment in question would need to take place and be carried out by a competent person. **detectortesters, No Climb Products Ltd** will endeavour to assist by supplying details of materials and technologies used in our products so that the person who is carrying out the risk assessment can make a suitable judgement.
